JACOB PETERSON

My career has given me experience applying a broad range of statistical and spatial methodologies and honed me into expert in R programming and working with a GIS. Academic research has prepared me to think critically, learn new skills independently and quickly, manage complex projects, and collaborate within teams to achieve results. I enjoy exploring datasets, solving the puzzles that accompany analysis, and transforming raw data into the solutions used to answer important questions.

I am currently looking for a data science position that allows me to solve pragmatic problems while leveraging my skills in data management, GIS, and statistical analysis.

💼 PROFESSIONAL EXPERIENCE

2019

Graduate Teaching/Research Assistant
Purdue University   📍 West Lafayette, IN
- Led design and development of a spatially explicit agent-based model
- Was the lead author on two grant application proposals
- Managed collaborations between universities, state agencies, and private stakeholder organizations
- Continued graduate coursework focusing in statistics and data science

2019 | 2016

Student Consultant
Oklahoma State University and Purdue University
- Drew on my expertise in R programming, statistics, and GIS to assist other students, post docs, and research staff within my graduate schools
- Consulting topics included: basic R programming, data cleaning, data management, statistical and spatial analysis
- Led help sessions one on one and within small working groups
- Provided detailed presentations about new techniques to lab research groups and graduate level classes

2018 | 2016

Graduate Research Assistant
Oklahoma State University   📍 Stillwater, OK
- Experience applying mixed-effect regression models and a variety of spatial movement and resource selection models
- Designed a spatial classification function in R to characterize different animal behaviors given GPS movement data of an individual
- Developed an R package to increase reproducibility of my research methods
- Located, obtained, prepared, and managed large datasets from multiple state and federal agencies, private companies, and universities
- Lead author on two academic manuscripts and multiple research summary reports

2016 | 2015

Field Technician – White-tailed Deer Capture
Missouri Department of Conservation   📍 Rea, MO
- Assisted in the capture and tagging of adult and neonate deer
- Used VHF and Iridium GPS telemetry to monitor individual survival and movement patterns
- Required adaptability and attention to detail to accomplish research goals when working in rough terrain and subject to variable weather patterns

2015 | 2012

Human Dimensions Technician
Colorado Parks and Wildlife   📍 Fort Collins, CO
- Assisted a variety of interdisciplinary projects in social science and natural resources
- Created summary reports for survey results and conducted literature reviews
- Designed and managed Access and ESRI geodatabases

CONTACT

- 🐙 github.com/jacpete
- 📞 +1 (913) 449-1623

SOFTWARE SKILLS
Highly experienced with
- Ⓡ R [5+ years]
- 🌐 ArcGIS [8+ Years]
- 🐧 Linux/Bash [4+ years]
- Ⓜ R Markdown [1+ Years]
- Github [4+ Years]
- HPC Systems [4+ Years]

Experience with
- Python [3+ Years]
- SQL [5+ Years]
- QGIS [2+ Years]
- Netlogo [6+ Months]
- HTML/CSS [4+ Months]

TECHNICAL SKILLS
- Data Management
- Data Cleaning/Unit Testing
- Data Visualization/Cartography
- Data Mining
- Statistical Analysis
  - GLMs/GLMMs
  - Categorical Analysis
  - Multivariate Analysis
  - Machine Learning
  - Bayesian Statistics
- Spatial Analysis
  - Geospatial Operations
  - Interpolation
  - Space Use Models
  - Movement Models

PROFESSIONAL SKILLS
- Critical thinking
- Independent learning and researching
- Project management
- Working effectively in a team
- Collaboration with external agencies and stakeholders
- Prioritize stakeholder needs in development
- Oral and written communication adapted to target audiences

2015 ● **GIS & Human Dimensions Independent Study**

Colorado Parks and Wildlife & Colorado State University 📍 Fort Collins, CO
- Began development of a method to spatially predict human attitudes and tolerance using survey response data
- Experience using SQL to interface with a database and Python & R to script a spatially-explicit model

2015 ● **NSF – Research Experience for Undergraduates Fellow**

University of Kansas 📍 Lawrence, KS
- Data-mined a fish stomach database using SQL and R to establish a food web for the North Atlantic Ocean and assess correlation between these interspecific relationships with meta-population synchrony

2014 ● **Field Technician – Mule Deer Neonate Capture**

Colorado Parks and Wildlife 📍 Piceance State Wildlife Area, CO
- Assisted in the capture and tagging of neonate deer
- Used VHF and Iridium GPS telemetry to monitor individual survival and assess cause of mortality
- Experience working alone and as a small team in remote field locations

2014 ● **Predictive Model for Archaeological Sites Affected by Flood Damage**

SIM Minor Capstone Project (CSU) 📍 Fort Collins, CO
- Designed a predictive model to locate prehistoric and historic cultural archaeological sites using spatial predictors
- Developed using Python scripts and ArcGIS

🎓 EDUCATION

Present | 2020 ● **M.Sc., Applied Statistics and Analytics**

University of Kansas Medical Center 📍 Overland Park, KS
- Emphasis: Data Science

2018 | 2016 ● **M.Sc., Natural Resources Ecology and Management**

Oklahoma State University 📍 Stillwater, OK

2015 | 2012 ● **B.S., Fish, Wildlife and Conservation Biology**

Colorado State University 📍 Fort Collins, CO
- Minor: Spatial Information Management (SIM)

🖥 TEACHING EXPERIENCE

2019 ● **Vertebrate Population Dynamics**

Purdue Department of Forestry and Natural Resources 📍 West Lafayette, IN
- Teaching assistant for senior-level undergraduate course
- Covered introduction to statistics and life tables in R, distance sampling using Program Distance and mark-recapture analysis with Program MARK
- Experience teaching quantitative topics to a diverse non-expert audience

2019 ● **Big Data in Forest Research – Guest Lecture**

Purdue Department of Forestry and Natural Resources 📍 West Lafayette, IN
- Guest lecture on using R as a GIS for a graduate course
- Covered an introduction to the `tidyverse`, the differences between packages `sp` and `sf`, using package `raster`, and mapping with `ggplot` and `tmap`

PROFESSIONAL COMMUNICATION
- I have given talks about my graduate research at five professional conferences in the last two years
- I currently have two scientific articles up for peer-review in professional journals

ADDITIONAL INTERESTS
- Continued Learning - I am always in pursuit of new methods, code libraries, and ideas that could increase the efficiency or statistical rigor of my analyses.
- Scientific communication - I enjoy explaining complex problems, statistical analyses, and their results to non-specialists.
- FOSS - I am an advocate for free and open source options that allow fully reproducible science and help others learn.
- Teaching/Mentoring - I have a passion for helping others discover how scripting and programming can make themselves more efficient.
